Backend Role Assignment Task

Task: Creating API Layer in NodeJS For Twilio WhatsApp Service

Reference Link: https://www.twilio.com/docs/sms/send-messages

Description:
Using Twilio WhatsApp Sandbox Candidate has to program an API in NodeJS to send
1. Text Message
2. Image Message
3. Video Message
4. Document Message

In API calls the user is supposed to provide the auth credentials (Ex. Account SID, Auth Token) and required parameters for sending these messages.
